#### UJI EFEKTIVITAS DAYA HAMBAT EKSTRAK MADU TERHADAP PERTUMBUHAN Salmonella typhi DENGAN METODE DIFUSI CAKRAM

Actional Program Statistics of the Statistical Statistics of the S

ABSTRAK Pendahuluan Denam tidi dina merupakan infeksi yang disebabkan oleh bakteri Salonnolla ryhyi. Penysiki ni pertu dilakakan pengendalan yaitu dengan cara pemberian antibisti. Penggunan antibisti seringkali menimbulian masalah resistensi dan efek oba ang tidak disebandaki. Oleh karam asil aresistensi baktan male teri dapa pemberikan ing tidak disebandaki. Oleh karam asil aresistensi baktan male teri dapa pemberikan ing tidak disebandaki. Oleh karam asil resistensi baktan male teri dapa pemberikan ing tidak disebandaki. Oleh karam asil teristensi baktan male teri dapa pemberikan ing tidak disebandaki. Oleh karam genganakan dapa pendentian tinya disebandaki bakan marin bakteri rancangne penelitian cross sectorosi. Sampel yang digunakan adaha biakan marin bakteri dilakukan kali diguna materikari dilakukan dengan dirisa penturbahan bakteri mala disemandi ang teris di antibari teris disebanda dengan dirisa teris dapa teristi mada asi me. Kesimpulan mang menghamba pertumbahan bakteri Salonnolla nyitu diguna potosi bendan pada kanomenang 2% dia bengbengka salagi pada kanosella signi tudiya, sama peneliti selanjanya malakakeri dilakukan kaleri salakun pada kanomenang 2% dia bengbengkan dengan disensi salari 10%, karam peneliti selanjanya malakakan penelitan dengan forias interoseganiane pang terbetai.

### EFFECTIVENESS OF HONEY ON INHIBITION OF Salmonella typhi GROWTH BY DISC DIFFUSION METHOD

#### ABSTRACT

ABSTRACT
ABSTRACT
ABSTRACT
ADDATEST of the other inferior caused by Schmondla typhi, This disence
foods in the controlled by giving authorities, The aute of mathemics due to accurate view of the
other of the scheme of the present evidence in the authorities, one of which is treated
naturally by using homey. Objectives This study to determine the authorative all activity of
boses on strains shownedt: hyphi. Meddods This research was descriptive with cross
sectional design. The samples were used pure bacterial culture of Sahmoella typhi.
Different concernations 12 %, 59%, and Indilutate homey and monitoriate the treatest
choromphenical. Each treatment was carried on 3 repetitions. Antibacterial testing using
choromphenical. Each treatment was carried on 3 repetitions. Antibacterial testing using
choromphenical. Stack treatment was carried on 3 repetitions. Antibacterial testing using
choromphenical. Stack treatment was carried on 3 repetitions. Antibacterial testing using
choromphenical. Stack treatment was during the start activity of the proper disc display in melod. Then years dimensional of 25%, 59%, 59% and
mm, 7.3 mm, and 8.3 mm. Concentain Honey can individue at a concentation of 50-000K.
Suggestion the next researcher conducted research with different types of microargumisms.

Keywords: Antibiotic, Typhoid Fever, Honey, Salmonella typhi
