TESTING EFFECTIVENESS OF Moringa Leaves (moringa oleifera) EXTRACT ON THE GROWTH OF candida albicans fungi

Introduction Morings leaves can be used to treat funged infections. This study aims to downwas the extrust of morings leaves towings soligion) against the inhibition of growth of the Candida additions funges. The research Morings leaves were extracted by marceations method using 190% ethanol solvent. The research was divided into 5 treatments, mannley positive control using between the effectiveness of morings leaf growth using divided fund 15%. Teasing the inhibitions of funged growth using divided fund 15% to the extraction of morings leaf extract to 50%, 50% and 75%. Teasing the inhibitions of funged growth using divididition. The research was divided into 5 treatments of interest of 15%, 50% and 15%. Teasing the inhibition of funged growth using the effectiveness of morings leaf extract thorings offered inhibition on the concluded of this task, moring also greaten (notings) edderen could not inhibit the growth of the Candida additions. Suggestions for further researchers are expected to conduct that so ling other methods.
