ABSTRAK

Pendahuluan :Pandangan di kalangan tertentu bahwa susu formula menjadi makanan yang cocok bagi bayi. Tetapi ada faktor lain juga yang biasanya menyebabkan ibu memberikan susu formula karena keadaan-keadaan seperti faktor pendidikan, pekerjaan, pengetahuan, ekonomi, budaya, sosial, psikologi, inovasi susu formula dan informasi dari tenaga kesehatan. Menant data tahun 2016-40% ibu bekerja memberikan bayinya dengan susu formula. Tujuan dari penelitian ini adalah menganalisis hubungan status pekerjaan dengan pemberian susu formula pada bayi usia 0-6 bulan di Desa Sumbergede Kecamatan Kepuhbaru Kabupaten Bojonegoro.**Metode penelitian** :Metode penelitian ini *Analtik* dengan pendekatan *Cross Sectional*. Populasinya seluruh ibu yang bayi usia 0-6 bulan sebanyak 30 orang dengan teknik *Total Sampling* sejumlah 30 orang. Variabel Independent Status Pekerjaan Ibu dan Variabel Dependent Susu Formula. Kemudian diuji menggunakan uji *Spearman Rank*. **Hasil penelitian** :Hasil penelitian didapatkan/bagian besar responden statusnya bekerja sebanyak 25 responden (83.3%) dan sebagian besar responden memberikan susu formula sebanyak 18 responden (60%). Dari analisis statistik dengan uji *Spearman Rank* sebesar 0.002, dengan peluang ralat kesalahan sebesar 0.002 dimana $p < \alpha$ (0.05).Dapat disimpulkan bahwa terdapat hubungan status pekerjaan dengan pemberian susu formula pada bayi usia 0-6 bulan. **Kesimpulan** :Disarankan kepada bidan dapat memberikan informasi tentang pentingnya memberikan ASI eksklusif dan menjadikan pertimbangan jika memberikan bayinya dengan susu formula.

Kata kunci : Status Pekerjaan, Susu Formula

**CORRELATION OF EMPLOYMENT STATUS WITH FORMULA FEEDING IN
INFANTS AGED 0-6 MONTHS
(In Sumbergede Village Kepuhbaru Sub-District Bojonegoro Regency)**

ABSTRACT

Introduction :The view among certain circles is that formula milk becomes a suitable food for babies. But there are other factors that usually cause mothers to give formula milk, due to circumstances such as educational factors, occupation, knowledge, economy, culture, social, psychology, formula milk innovation and information from health workers. According to 2016 data 40% of working mothers provide their babies with formula milk. The purpose of this study is to analyze the correlation of employment status with formula feeding in infants aged 0-6 months in Sumbergede Village Kepuhbaru District Bojonegoro Regency. **Research Metode** :This research method uses analytical research with a cross sectional approach. The population taken by all mothers who are babies aged 0-6 months as many as 30 people with a total sampling technique of 30 people. The variable Independent the employment status of the mother and Variable Dependent formula milk using the Spearman Rank test.**Research Result** :The results found that the majority of respondents worked as many as 25 respondents (83.3%) and most respondents gave formula milk as many as 18 respondents (60%). From statistical analysis using spearman rank statistical test of 0.002, with odds of
