CUPPING THERAPY IN HYPERTENSIVE PATIENTS

ABSTRACT

ABSTRACT

Introduction: Blood pressure in people with hypertension is often uncontrolled in a sinustion where those pressure increase abstrantly. Hypertension is also defined as an increase to blood pressure is also defined as an increase to blood pressure is 140 miltig and the disastolic pressure is above 90 miltig. The alm of his literature Review is beinferty unique theory in hypertension when the systolic blood pressure is 140 miltig and the disastolic pressure is above 90 miltig. The alm of his literature Review is to identify cupping theory in hypertensive patients beautiful on empirical studies for the last 5 years. Review of the design literature. Search using the Google Scholar disasting, Production and Seenee direct, articles on subject published in Indioestium and Articles were selected by journal selection, otherwise selection with inclusion criteria, exclusion so that purunds to be reviewed were found. Results: literature Review form 11 selected journals were then categorized into 2 complementary therupies. Consists of 6 carrieles of set outpring thereign al. 2015. [Readward & Rurahami, 2016, 16 thatani, and 251 carrieles on cupping thereign and 2515, 16 carrieles on cupping therapy (Projue et al. 2017), [Fatound & Rikinstore, 2015, 15 the criteria indicate importance for people with hypertension. Conclusion: Indicates that cupping indicates that cupping
