DESCRIPTION OF WHITE ONWAY EXTRACT (Allium sativum L.) TOWARD MUSHROOM GROWTH Candida albicans

## ABSTRACT

Introduction Leucorrhoea is an infection caused by Candida species. In fact, more than 75% of women have experienced vaginal discharge. The development of broad spectrum chemical antifugand research has not made significant progress. Antifung have the ability to inhibit fungi (fungistalss) or kill fungi (fungistalss). In Indonesia there are various types of medicinal plants, including agrife which can be used as an antifugual substitute. The research method is an experimental study using gartle extract (Amilum sativum L.) various concentrations, namely 20% 47% 80% 100%. The results showed that gartle extract can inhibit the growth of Candida abbeans fungi starting at a concentration of 8% with an inhibition zone of 15 mm, at a concentration of 100% froming an inhibition zone of 15 mm, in accordance with the Standards of the Ministry of Health of the Republic of Indonesia regarding antimicrobial sensitivity of plant origin. From the
