COMPERHENSIVE MIDWIFERY CARE IN MRS "D" G2PIAO WITH NORMAL PREGNANCY AT PMB ITA AFRIANI NINGKUM,A MD.KEB IN REJOSO PETERONGAN JOMBANG

ABSTRACT

Introduction Preguachy, childbirth, newborns, acoustes and family planning are common natural conditions, but it willbecome a problem interference if there is. The thirdtrinester of a pragnancy, pragnatus women will experience assense of activity disturbance, nor of which is much untanton. This slightly disturburs he mother deep sleep, which requires her to go to the abstraction more office. In care by repeating, vinitation can be counted, but in the I and III comprehensive midwifery care for pragnan women, childbirth low birth weigh, neonates, and family planning complaints of a good deal unitation. Method of midwifery care used in this study was an approach to patients, interview, observation, direct and online management. The subject in this case is Mrs. "D' G2/PAO with complaints of much unitanton The conclusion of this comprehensive midwifery care is obtained by approaching the padent, interviewing and observing. Conducted independentently and in collaboration with senior midwifes. Therebwere no complications
